

Mushroom Day at The Holden Arboretum

From Field Forays to Research

Sunday, September 25, 2016
9:00 am to 5:00 pm

Ohio has more than 2,000 kinds of fungi. Ohio's premier field mycologist and author Walt Sturgeon will present a slide program about mushrooms and how to identify them. Also participating will be naturalist Debra Shankland, President of the Ohio Mushroom Society, and Ohio photographer and mushroom aficionado Ian Adams, who will share tips on photographing mushrooms. Participate in forays to Holden's woodlands to observe and collect mushrooms for identification and display. Holden's Research Director Dr. David Burke will share how Holden uses fungi to study the health of forest soil and how DNA analysis is used to identify fungi being studied in Holden's forest ecosystems. Mushroom books, fliers and other mushroom-related materials will be available for purchase. Sample some tasty recipes for cooking edible mushrooms. Please bring a lunch and dress for the weather of the day.

Join us for this fun day exploring the amazing world of mushrooms!

Mushroom Day at The Holden Arboretum

From Field Forays to Research

Sunday, September 25, 2016

Schedule

9:00 am - 9:15 am	Introduction	Ian Adams
